

FULL PATIENT PICTURE. FULLY INFORMED DECISIONS.

Predict Risk, Proactively Manage Care, and Improve Patient Outcomes - all in one platform.

Turn your Data into Actionable Insights with Acuity Analytics.

Gain a clear view into your patient population with aggregated, multi-source data that goes beyond episodic case management. Drive improved outcomes across the entire care continuum, guiding members to the right care, in the right setting, at the right time.

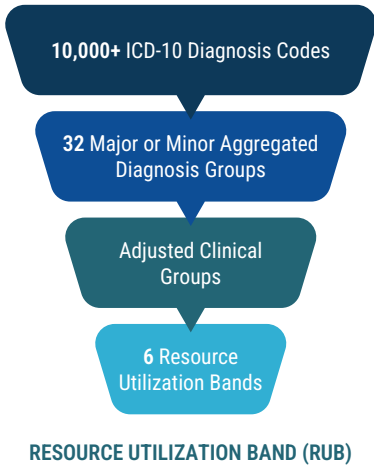

Utilizing the Johns Hopkins ACG® System, Acuity Analytics empowers clients with risk cohorts and automates workflow steps to begin the engagement process. Beyond clinical risk assessment, Acuity Analytics delivers valuable financial insights into both current spending and future financial risks.

- ✓ **Streamline Care Management**
- ✓ **Improve Outcomes With Care Coordination**
- ✓ **Assess Physician Performance**
- ✓ **Allocate Resources Appropriately**
- ✓ **Gain Prompt Insights From Pharmacy Data**

Powerful insights that go beyond just medical records.

Seamlessly collaborate with other care providers to improve care coordination and develop complete, longitudinal records that address aspects of individuals' needs.

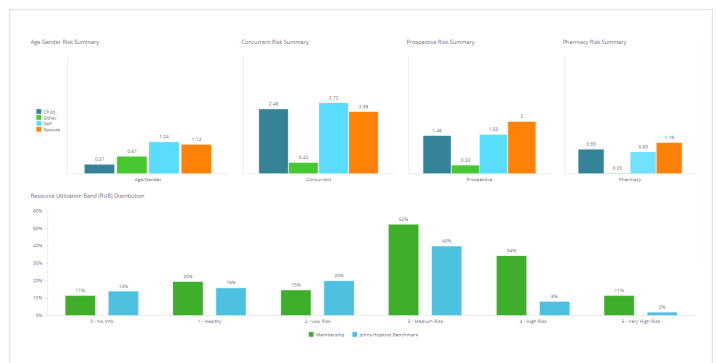

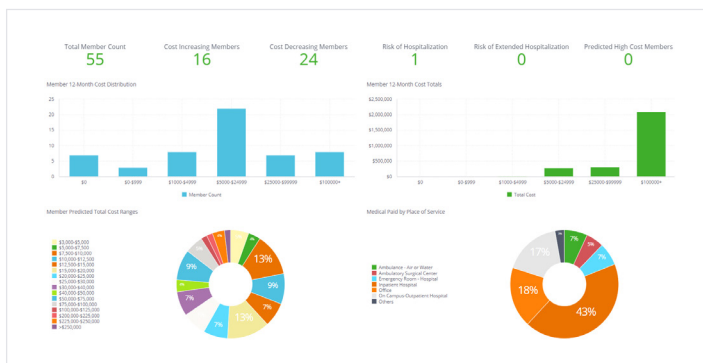

The Johns Hopkins ACG® System harnesses data from various sources, enabling healthcare providers, organizations, and public-sector agencies to analyze and forecast a population's healthcare utilization and costs.

Clinicians can utilize thousands of International Classification of Disease (ICD) diagnosis codes to describe patients' health conditions. Using a systematic categorization process, the Johns Hopkins ACG System allocates members into six bands of resource utilization.

Proprietary algorithms unlock robust data analysis, reporting, and data warehousing services for healthcare organizations.

Flexible data filtering options to support your dashboard and reporting needs.

Whether you are an executive, administrator, or provider, Acuity Analytics' dashboards delivers information tailored to fit your needs.
